Your Independent Agent:

Don't Replace Your
Windshield...
REPAIR IT!

Did You Know...

If you have your windshield repaired rather than replaced, we waive your deductible so there is no out-of-pocket expense to you.

Not to mention the time you save!

A repair can be done in as little as 30 to 45 minutes and can be fixed while you wait.

Repair keeps your current windshield factory seal intact, avoiding possible leaks and wind noise.

Some glass companies come to your home or work to repair your windshield. Ask about this service when you call our Glass Call Center.

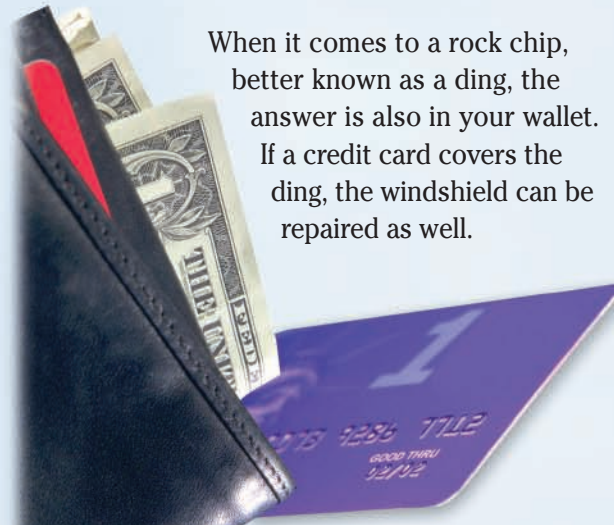

Process of repairing a cracked windshield:

When can my windshield be repaired?

If your windshield is cracked, pull a dollar bill from your wallet. If the bill covers the crack, a professional windshield repair company can fix it.

When it comes to a rock chip, better known as a ding, the answer is also in your wallet. If a credit card covers the ding, the windshield can be repaired as well.

What should I do if I get a crack or ding in my windshield?

Cover the damaged area with clear tape to prevent contaminants from lodging in the crack.

Have it repaired as soon as possible because heat and movement can cause it to spread.

Bottom Line...
REPAIR SAVES YOU MONEY AND TIME
